TURIN BETWEEN SURREALISM AND METAPHYSICS*

The exhibition presents 14 artworks matching the same past and contemporary painters who have grasped the most varied aspects of dreams and the visionary world. They are Piedmontese artists of Surrealism current, contraction of “surrealism and fantasy”: Gilardi (Abacuc), Alessandri, Allimandi, Assetto, Camerini, Carella, Colombotto Rosso, Cremona, De Agostini, Forgione, Jervolino, Macciotta, Minero, Ponte Corvo. Turin, magical city par excellence, has always preferred the taste for the exotic and the imaginary. It is still a breeding ground where the fantastic-surreal art has been able to develop.

“Torino magica” is also the title of one of the works, where the Mole, dressed up of lights, stands out in a blue nocturnal sky.
