

Transits

The word *Transits*, title and topic of the exhibition, can be interpreted from different points of view: passage, movement, change, means, path.

On various occasions Piedmont Regional Council has supported the reasons of peace and acceptance towards others, the different, the distant. The exhibition promotes works of art by Italian and international artists who have been able to tell the pain, the yearning for freedom, the difficult journeys towards a better future.

There are three sections: the artists of the world, the languages of the world and transits. The first is dedicated to the artists who have lived the experience of emigration on their skin, the second to the Babel tower, wish for union, and the third to the artists who take in their work the passage as necessary moment of regeneration and spirituality.
